ABSTRACT

The purpose of this study is to analyze of alcohol consumption among college students in Miri. It is based on students spend their time, money and behavior of consuming alcohol. The research is focus on college student's behavior of consuming alcohol in Miri. The research is using questionnaire method and gathers information from 60 respondents. Researcher focuses on college students for around 18 to 30 and above years old. The data are collected and analyze using simple statistic method. The research result indicated 4 major findings. The first finding is the respondents are consuming alcohol because of influence of adult and curiosity. Therefore, respondents are active drinker. From the research, college student more consuming beer and soju. Respondents choose light drink to consume. Respondents mostly spend more than they could effort and get money from parents and other resources. In forth finding is respondents are drive after drinking which after consume 3 to 5 drinks. From the result, the researcher suggests several recommendations for implemented. For first finding is parents and educate should be take strictly. Besides that, should let college students know the effect after consuming alcohol. In third recommendations, as parents should put limit and keep on update of students spending activities. Lastly, in fourth finding, communities have to take action seriously on road especially after 10 at night.
