ABSTRACT

This research is mainly conducted to study about the usage of digital wallet for students in IBS College. Nowadays, digital wallet is getting to gradually become known. It will cause students to spend their money easily without financial management. This study will show the types and duration of digital wallet that students are having. It also talk about the behaviour on usage of the digital wallet. The researcher has adopted quantitative method which the collection method used questionnaire as to explore result of the research questions. It involves using a self-designed questionnaire to collect data from respondents. By using questionnaire survey is an effective method, because it is a simple way to collect data or opinions from a large group of people. The findings of this research show that college students' awareness on using digital wallet, it shows that a majority of the respondents agree that inconvenience in completing the online payment transaction. The future research can be done on the digital wallet's users outside IBS College. Besides, the behaviours of digital wallet's users in regards of the purpose and using digital wallet. Also, their thoughts and behaviours might change when they are in different stage, age, and status.
